Onra Instructor Prototype Update and Walkthrough

Overall modules done 2/5

This update covers these modules:

- Dashboard
- Schedule

Note:

- Today's feedback from the meeting/docs is not tackled yet and push to the Vercel version today, we only push what we have done this week and the previous week. In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>"
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1 Dashboard

The instructor's landing page when they sign in. Surfaces the day's classes, performance KPIs, and quick-action shortcuts at a glance — scoped entirely to the instructor's own data (no cross-instructor visibility).

Capabilities:

- KPI Cards — Classes today, classes this week, total attendance count, average rating across the instructor's classes.
- Upcoming Class Card — Next class with time, room, booked / capacity.
- Live Sync With Admin Side — KPI counters and the upcoming card update in the same render cycle when admin assigns / cancels / reschedules a class.
- Audience-filtered Feed — The instructor sees only events relevant to their own classes (class assigned, class cancelled, attendance reminders) — admin events are filtered out.

2 Schedule

The instructor's own day / week / month schedule grid. Mirrors the admin schedule visually but is scoped to classes the instructor teaches, with personal availability overlays (assigned shift, blocked time) layered on top.

Capabilities:

- Three Views — Day, Week, Month — toggle from the page header.
- Class Cards — with title, time, room, booked / capacity.
- Filter Side Panel — Slide-in / slide-out motion matches the admin filter pattern.
- Personal Blocked Time Overlay — When admin adds a blocked-time entry for the instructor, the schedule grid renders a striped "Blocked HH:MM – HH:MM".
- Class details still on the development.

Onra Instructor Prototype Update and Walkthrough

Overall modules done 2/5

This update covers these modules:

- Dashboard (update)
- Schedule (update)
- General updates (update across several modules)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>"
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Dashboard (Update)

Every KPI card on the dashboard now opens a detailed modal, and upcoming class cards surface booking status at a glance — matching the customer side.

Capabilities:

- Clickable KPI cards — Each metric on the dashboard now opens a modal with the full list behind the number:
 - Classes — every class the instructor is teaching in the selected period.
 - Attendance rate — per-class breakdown showing attended vs. no-show counts for each of the instructor's classes.
 - Clients taught — every customer the instructor has taught at least once.
- Sortable attendance table — Inside the Attendance rate modal, every column can now be sorted.
- Cancellations "View details" link — Each cancellation row now opens the class schedule where the customer originally booked, so the instructor can see the full context of the cancelled booking in one click.
- Status badge on upcoming classes — Upcoming class cards now show a status badge (Booked / Waitlisted with position number). And upcoming will be sort to show only the upcoming classes

2. Schedule (Update)

The schedule now stays entirely inside the instructor side. Class cards and detail pages no longer jump to the admin view.

Capabilities:

- Class details still on the development.
- Everything stays on instructor side — Class cards, class detail pages, and all follow-up links stay within the instructor experience. Previously, clicking a class card from the instructor dashboard or schedule would jump to the admin class detail; now it opens the instructor's own class detail page on every status (Upcoming, Ongoing, Completed, Cancelled).
- Instructor schedule view container now set to fill view area, so the scroll only happen inside the container not outside the container, its for prevent the “tab is being scrolled”.

3. General Update

The instructor's own day / week / month schedule grid. Mirrors the admin schedule visually but is scoped to classes the instructor teaches, with personal availability overlays (assigned shift, blocked time) layered on top.

Capabilities:

- Global search removed on instructor side — The instructor side no longer shows the global search button. It's an admin-only tool now.
- Back returns where you came from — Every detail page on the instructor side remembers where you opened it from. Closing it returns you to the previous page, not always the module list.

Onra Instructor Prototype Update and Walkthrough

Overall modules done 3/5

This update covers these modules:

- Earning module (new)
- General updates (update across several modules)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Earnings (New)

The Earnings module is now fully developed, with a class detail page for every class status.

Capabilities:

- Earnings list — A full list of every class you've taught, with the earnings amount per class. Filter by date range, status, or class type.
- Class detail on every status — Click any class card to open its full-screen detail page. The detail adapts to the class status:
 - Upcoming / Ongoing — opens the live class detail with the roster and attendance marking.
 - Completed — opens the completed class detail with attendance, ratings, and your earnings for that session.
 - Cancelled — opens the cancelled class detail with the cancellation context.

2. General Updates

- Fix bug in the instructor side.
- Update data synchronization between the admin and instructor so that data on the admin side is transmitted to or reflected on the instructor side, and vice versa.

29/06/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 3/5

This update covers these modules:

- General updates (update across several modules)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. General Updates

- Instructor schedule reads from the same class schedules + appointments slices the admin sees. When admin marks attendance, cancels a class, or runs payroll, the instructor view re-syncs on the same render cycle.
- /instructor/earnings reads the same payRates slice that /admin/compensation writes to. When the admin updates a pay rate, the instructor's earnings figures are reflected immediately.
- Instructor notifications read from the same shared slice as admin — admin-triggered events (class cancellation, payroll run, etc.) flow through to the instructor feed.
- Instructor footer correctly hides the Settings link (instructors don't have admin Settings access).

Onra Instructor Prototype Update and Walkthrough

Overall modules done 3/5

This update covers these modules:

- General updates (update across several modules)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Instructor Profile

The instructor's own account settings screen. Same visual language as the admin Account settings.

Capabilities:

- Personal information, Integrations, Notification settings tabs — Everything the instructor needs to configure lives under one screen.
- Password section — Reveals the current password with an eye toggle. A subtle info line underneath shows the last change date.
- Active sessions — Lists every device signed in, with the current one tagged with a green "Current" pill and any other device given a red "Sign out" action that removes it from the list with a confirmation toast.
- Working days — Weekday letters (M–T–W–T–F–S–S) highlight the days the instructor is available; the off days read in red so scheduling conflicts are obvious.

09/07/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 4/5

This update covers these modules:

- Notifications module (new)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Notifications (new)

The instructor's own notification feed — scoped to events that involve their own classes.

Capabilities:

- Audience-filtered feed — Each instructor sees only events relevant to their own classes. Admin-only events are filtered out.
- Grouped by date — Notifications are grouped Today / Yesterday / Earlier so recent events are easy to find.
- Mark as read — Click any notification to open the related record; the unread count updates instantly. Or use "Mark all as read" to clear the badge at once.
- Live sync with admin — When admin cancels a class, assigns a substitute, or a customer books or cancels, the notification appears in this feed on the same tick — no refresh needed.

10/07/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 4/5

This update covers these modules:

- Profile module (new)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Profile module (new)

The instructor's own account page — personal details, work info, integrations, notification preferences, and security, all scoped to the logged-in instructor.

Capabilities:

- Personal Information — Name, email, phone, introduction, work experience, and assigned class categories, with the instructor's shift hours and working days shown at a glance.
- Branch Information — The branch the instructor is assigned to, with its address, working days, and opening hours.
- Edit Profile — Update personal details and introduction from one screen; changes reflect on the instructor's schedule and dashboard right away.
- Notifications — Turn each notification type on or off to control what the instructor receives.
- Integrations — Connect the instructor's own tools (e.g. calendar) from the account page.
- Security — Change password and review active sessions in a dedicated tab, kept separate from personal details so the page stays easy to scan.

22/07/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 6/6

This update covers these modules:

- Shift & Time off module (new)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Shift & time off module (new)

The instructor's view of their own shifts and the time off they've requested.

Capabilities:

- Matches the new Staff & Shift model — Shifts and time off now follow the same updated model as the admin side, including support for an instructor holding more than one shift.
- Multi-day time off — A single time-off entry can span a date range, and it correctly blocks every day it covers in the instructor's schedule.
- Own entries only — Time off an instructor submits is theirs to manage; entries the studio created for a group show as read-only with a note that they're managed by admin.
- Customers wording — Instructor screens now say "Customers" instead of "Members".

29/07/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 6/6

This update covers these modules:

- Earnings (update)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Earnings (update)

Your own earnings — pay rate, totals, breakdown and per-booking figures.

Capabilities:

- Matches the admin's payroll — Your Earnings now use the same pay-rate setup and calculation as the studio's Staff Payroll Details, so your total earnings and breakdown line up exactly with what the studio sees.
- Total earnings breakdown — Total earnings splits across your default rate, pay per class, pay per private and any sales commission, in the same collapsible cards the admin uses.
- Per-booking earnings by rate — Each class or private shows the rate that applies to it and what it earned; anything covered by your base salary shows "-" and AED 0, since salary isn't paid per booking.
- Clearer Pay rate card — The Pay rate card shows your default rate and its amount at a glance.

10/08/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 6/6

This update covers these modules:

- Dashboard (update)
- Class schedule & details (update)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Dashboard (update)

Capabilities:

- The **4 dashboard pop-ups** (Attendance, Classes, Cancellations, Clients) now **look and work like the admin ones** — same clean table style **with page navigation (pagination)** they were missing — plus proper spacing at the top.

2. Class schedule & details (update)

Capabilities:

- Instructor **schedule Day/Week view now opens at the current time** automatically (like the admin side), instead of scrolling from the top.
- Instructors now show their **real photo** (with initials fallback).

13/08/2026

Onra Instructor Prototype Update and Walkthrough

Overall modules done 6/6

This update covers these modules:

- Schedule (update)

Note:

- In the prototype, maybe you will see some 404 page; that means the page/module/feature is still being developed.
 - New side for instructor: to navigate to instructor please change the link to "<https://onra-poject.vercel.app/instructor/dashboard>" and for the admin side, please change it back to "<https://onra-poject.vercel.app/admin/dashboard>", for the customer side please change the link to "<https://onra-poject.vercel.app/customer>".
 - Interactive experience — This is a fully interactive prototype. Feel free to click, create, edit, and delete items to test the workflows.
 - Live updates — The prototype uses realistic sample data. Any changes you make apply live as you navigate between different screens.
 - Session persistence — Any data you create, edit, or cancel survives a page refresh and tab close. Your demo session sticks until you explicitly reset.
-

1. Class schedule (update)

Capabilities:

- Update Time Off - synchronize the data with the Admin side across the table view and Time Off form.
- Update Schedule - change "Total X classes" to "Total X schedules" since the Schedule module includes different schedule types.
- Update Schedule - reuse the same Time Block component used on the Admin side.
