

Onra · Insights — KPI Catalogue

Every KPI, grouped by category · currency = AED

Type: *Lookback* — sums over the selected period (date filter applies) · *Snapshot* — state as of now · *Forward / live* — uses a horizon, lives on the Dashboard, not the filter

FINANCIAL				
#	KPI	What it measures / how it's calculated	Type	Notes — comparison, format, drill-through
1	Net revenue	Revenue earned (recognized) after refunds & discounts	Lookback	
2	Gross revenue	Total billed before refunds & discounts	Lookback	
3	Sales by stream	What was sold, split across classes, packages, subscriptions, products, gift cards	Lookback	% mix per stream
4	Avg revenue per member (ARPM)	Net revenue ÷ active members	Lookback	
5	Refunds & discounts	Total refunded + discounted in period	Lookback	% of gross
6	Payments collected	Payments successfully taken — most are paid upfront before the class	Lookback	
7	Failed payments	Recurring membership charges that declined (e.g. expired card). The only real outstanding amount — there are no invoiced dues.	Forward / live	Count + AED amount · click → recoverable list · shown on Members as "billing issues"
8	Failed-payment recovery rate	Recovered ÷ total failed value	Lookback	%
9	Revenue per class	Revenue attributed ÷ sessions run	Lookback	
10	Revenue per visit	Revenue attributed ÷ attendees	Lookback	
11	Recurring revenue / month (MRR)	Monthly recurring revenue from active subscriptions	Snapshot	

CLIENT				
#	KPI	What it measures / how it's calculated	Type	Notes — comparison, format, drill-through
12	Active members	Anyone holding a live plan — recurring subscription, one-off package, or intro	Snapshot	Count + net change · "as of now"
13	Net member change	New – lost in period	Lookback	± count
14	New sign-ups	New members acquired in period	Lookback	Count + % delta
15	Active recurring subscriptions	Members currently on a recurring plan	Snapshot	Count
16	Active one-off packages	Members currently on a one-off pack (e.g. 20-class)	Snapshot	Count
17	Active intro offers	Intro offers currently running	Snapshot	Count
18	Churn rate	Members lost ÷ members active at the start of the period	Lookback	%
19	Retention rate	1 – churn rate (members kept)	Lookback	%
20	Cancellations — on time	Cancelled before the cutoff window — credit returned	Lookback	Count
21	Cancellations — late	Cancelled after the cutoff window — credit lost	Lookback	Count
22	Upcoming renewals / expiries	Plans due to renew or expire within the horizon	Forward	Count + AED value · click → list of clients about to expire / just renewed
23	Lifetime value (LTV)	Avg total revenue per customer across the whole relationship	Snapshot	all-time, ignores the date filter
24	New vs. returning	First-time vs. repeat clients in period	Lookback	Counts + ratio
25	First-time visitors	People attending for the very first time	Lookback	Count
26	Avg visits per client	Visits ÷ active clients in period	Lookback	Number
27	Visit → member conversion	First-time visitors who go on to buy a plan	Lookback	% · also a Marketing funnel metric
28	Intro → paid conversion	Intro buyers who bought a real package/membership (within 30 days of intro ending) vs. one-and-done	Lookback	% · click → converted vs. lapsed · also Marketing funnel
29	At-risk clients	Active clients with no visit in 14–30 days	Forward / live	Count → win-back list
30	Win-back rate	Lapsed clients reactivated ÷ targeted	Lookback	% · win-back is a Marketing campaign outcome
31	Top spenders	Clients ranked by revenue in period	Lookback	Ranked list

CLASS				
#	KPI	What it measures / how it's calculated	Type	Notes — comparison, format, drill-through
32	No-shows	Never cancelled and never showed up (3rd cancellation type)	Lookback	Count · also drives no-show rate
33	No-show rate	No-shows ÷ booked	Lookback	%
34	Class occupancy	Booked seats ÷ capacity	Lookback	% Did the seats sell? e.g. 8 booked of 10 = 80%. Counts reservations, not who shows up. Low = demand/scheduling problem.
35	Attendance rate	Attended ÷ booked	Lookback	% Of those who booked, who actually came? e.g. 6 attended of 8 booked = 75%. Low = no-show problem. Equals occupancy only when sold out AND zero no-shows.
36	Attendance by class type	Attendance rate split by format — surfaces formats that aren't working	Lookback	% per type Attendance rate broken out per format (Reformer, Mat. Barre. Snin...)
37	Attendance by time slot	Occupancy/attendance by day & time — surfaces timings that aren't working	Lookback	% heatmap Dark cells = busy slots, pale = dead slots.
38	Classes scheduled	Sessions on the calendar	Lookback	Count

Onra · Insights — KPI Catalogue

Every KPI, grouped by category · currency = AED

Type: Lookback — sums over the selected period (date filter applies) · Snapshot — state as of now · Forward / live — uses a horizon, lives on the Dashboard, not the filter

39	Total attended	Total attendances across classes	Lookback	Count
40	Unique attendees	Distinct people who attended	Lookback	Count
41	Bookings ahead	Seats already booked for upcoming sessions	Forward	Count · next 7 / 30 days
42	Waitlist conversions	Waitlisted → confirmed seats	Lookback	Count + %
43	Avg class size	Attendees ÷ classes run	Lookback	Number
44	Class popularity	Classes ranked by bookings / fill	Lookback	Ranked list
45	Bookings by source	Where bookings come from (booking channel)	Lookback	App vs. website % split

MARKETING

#	KPI	What it measures / how it's calculated	Type	Notes — comparison, format, drill-through
46	New leads	New prospects captured in period, by configurable source	Lookback	Count + delta · feeds the funnel
47	Leads by source	Acquisition mix across sources (Instagram, referral, walk-in, web/Meta form, ClassPass, Gympass...)	Lookback	% mix per source · configurable list
48	Lead → trial conversion	Leads who booked a trial / intro	Lookback	%
49	Lead → paid conversion	Leads who became paying members (full funnel)	Lookback	% · click → funnel breakdown
50	Avg time to convert	Avg days from lead created to first purchase	Lookback	Days
51	Open leads by stage	Leads currently in follow-up, split by stage (New, Contacted, Trial booked, Follow-up)	Snapshot	Count per stage · from lead/CRM layer
52	Avg time to first contact	Avg time from lead created to first staff touch	Lookback	Median hours
53	Campaign reach / sends	Messages sent across email, WhatsApp, push	Lookback	Count by channel
54	Campaign engagement	Open / click (email), read (WhatsApp), tap (push)	Lookback	% per channel
